Data Source: Astoria Portfolio Advisors, Orion, Fundpeak, and TopSheets. Data as of September 29, 2023. The performance for June 2017 through January 2019 represents model performance. For the month of January 2019, the net model performance was 6.46%. The performance for February 2019 through September 2023 is based on the composite performance for all accounts invested in the Dynamic Aggressive Model. For the period February 2019 through December 2019, the net composite performance was 12.29%. Please see the disclaimers below for more details regarding performance calculations. Growth of \$10,000 shown in the chart represents the cumulative total return of the Astoria Portfolio composite since inception, net of fees. Investment return and principal value of an investment with Astoria Portfolios will fluctuate so that an investor's investment when redeemed may be worth more or less than their original cost. All risk/return statistics shown are calculated on an annualized basis since inception where applicable. The benchmark is used as a reference data set for the calculation of beta. For trailing returns, YTD and cumulative numbers are not annualized. All other numbers are annualized. As with any investment strategy, there is a potential for profit as well as the possibility of loss. Net Returns incorporate 15bps annualized management fee. The benchmark for the Dynamic Aggressive Model is 70% MSCI All Country World Index (NDUEACWF) and 30% Bloomberg Barclays Global Aggregate Bond Index (LEGATRUU) and is rebalanced monthly. Since inception refers to June 2017.

Investments involve risk and unless otherwise stated, are not guaranteed. Readers of the information contained on this Performance Summary, should be aware that any action taken by the viewer/reader based on this information is taken at their own risk. This information does not address individual situations and should not be construed or viewed as any type of individual or group recommendation. The model delivery performance for June 2017 through January 2019 shown represents only the results of Astoria Portfolio Advisors model portfolios for the relevant time period and do not represent the results of actual trading of investor assets unless otherwise indicated. Model portfolio performance is the result of the application of the Astoria Portfolio Advisors proprietary investment process. Model performance has inherent limitations. The results are theoretical and do not reflect any investor's actual experience with owning, trading or managing an actual investment account. Thus, the performance shown does not reflect the impact that material economic and market factors had or might have had on decision making if actual investor money had been managed. Model portfolio performance for the Dynamic Aggressive Model is shown net of the model advisory fee of 0.15% charged by Astoria Portfolio Advisors and does not include trading costs. Effective October 2019, trading commissions were waived at several of the large custodial platforms. The model delivery performance results are net of Astoria Portfolio Advisors' fee and does not include any additional advisory fees charged by advisors employing Astoria's models.

The annualized net performance for Dynamic Aggressive Model Composite and benchmark for the period February 1, 2019, to September 29, 2023, is 6.39% and 4.96%, respectively. The composite performance is shown net of the model advisory fee of 0.15% charged by Astoria Portfolio Advisors and includes trading costs when they were in effect. The composite performance results are net of Astoria Portfolio Advisors' fee and does not include any additional advisory fees charged by advisors employing Astoria's models.

Any additional fees charged by an advisor will reduce an investor's return. Performance results shown include the reinvestment of dividends and interest on cash balances where applicable. The data used to calculate the model performance was obtained from sources deemed reliable and then organized and presented by Astoria Portfolio Advisors. The performance calculations have not been audited by any third party. Actual performance of client portfolios may differ materially due to the timing related to additional client deposits or withdrawals and the actual deployment and investment of a client portfolio, the reinvestment of dividends, the length of time various positions is held, the client's objectives and restrictions, and fees and expenses incurred by any specific individual portfolio.

Benchmark: The Dynamic Aggressive Model performance results shown are compared to the performance of 70% MSCI All Country World Index (NDUEACWF) and 30% Bloomberg Barclays Global Aggregate Bond Index (LEGATRUU). Prior to January 2021, the benchmark was 70% MSCI All Country World Index (NDUEACWF), 15% Bloomberg Barclays Global Aggregate Bond Index (LEGATRUU), and 15% Wilshire Liquid Alternative Multi-Strategy Index (WLIQAMST). The index results do not reflect fees and expenses and you typically cannot invest in an index. Return Comparison: Both the MSCI All Country World Index and the Bloomberg Global Aggregate Bond indices were chosen as they are generally well recognized as an indicator or representation of the stock and bond market and include a cross section of holdings.

Actual performance of client portfolios may differ materially due to the timing related to additional client deposits or withdrawals and the actual deployment and investment of a client portfolio, the reinvestment of dividends, the length of time various positions is held, the client's objectives and restrictions, and fees and expenses incurred by any specific individual portfolio.

Benchmark: The Dynamic Growth & Income Model performance results shown are compared to the performance of 50% MSCI All Country World Index (NDUEACWF) and 50% Bloomberg Barclays Global Aggregate Bond Index (LEGATRUU). Prior to January 2021, the benchmark was 50% MSCI All Country World Index (NDUEACWF), 35% Bloomberg Barclays Global Aggregate Bond Index (LEGATRUU), and 15% Wilshire Liquid Alternative Multi-Strategy Index (WLIQAMST). The index results do not reflect fees and expenses and you typically cannot invest in an index. Return Comparison: Both the MSCI All Country World Index and the Bloomberg Global Aggregate Bond indices were chosen as they are generally well recognized as an indicator or representation of the stock and bond market and include a cross section of holdings.

Dynamic Conservative ETF Portfolio

INVESTMENT OBJECTIVE & STRATEGY

Astoria's Dynamic Conservative Strategy focuses on long term income and growth by blending various equity factors along with allocations to fixed income and alternatives.

It will maintain approximately 25%-35% in equities, 50%-60% in fixed income, and 10%-15% in alternatives.

Our benchmark is 30% MSCI All Country World Index (NDUEACWF) and 70% Bloomberg Barclays Global Aggregate Bond Index (LEGATRUU) and is rebalanced monthly. There is generally one or two strategic rebalances per year assuming normal market conditions.

Data Source: Astoria Portfolio Advisors, Orion, Fundpeak, and TopSheets. Data as of September 29, 2023. The performance for June 2017 through January 2019 represents model performance. For the month of January 2019, the net model performance was 3.83%. The performance for February 2019 through September 2023 is based on the composite performance for all accounts invested in the Dynamic Conservative Model. For the period February 2019 through December 2019, the net composite performance was 9.04%. Please see the disclaimers below for more details regarding performance calculations. Growth of \$10,000 shown in the chart represents the cumulative total return of the Astoria Portfolio composite since inception, net of fees. Investment return and principal value of an investment with Astoria Portfolios will fluctuate so that an investor's investment when redeemed may be worth more or less than their original cost. All risk/return statistics shown are calculated on an annualized basis since inception where applicable. The benchmark is used as a reference data set for the calculation of beta. For trailing returns, YTD and cumulative numbers are not annualized. All other numbers are annualized. As with any investment strategy, there is a potential for profit as well as the possibility of loss. Net Returns incorporate 15bps annualized management fee. The benchmark for the Dynamic Conservative Model is 30% MSCI All Country World Index (NDUEACWF) and 70% Bloomberg Barclays Global Aggregate Bond Index (LEGATRUU) and is rebalanced monthly. Since inception refers to June 2017.

Readers of the information contained on this Performance Summary, should be aware that any action taken by the viewer/reader based on this information is taken at their own risk. This information does not address individual situations and should not be construed or viewed as any type of individual or group recommendation. The model delivery performance for June 2017 through January 2019 shown represents only the results of Astoria Portfolio Advisors model portfolios for the relevant time period and do not represent the results of actual trading of investor assets unless otherwise indicated. Model portfolio performance is the result of the application of the Astoria Portfolio Advisors proprietary investment process. Model performance has inherent limitations. The results are theoretical and do not reflect any investor's actual experience with owning, trading or managing an actual investment account. Thus, the performance shown does not reflect the impact that material economic and market factors had or might have had on decision making if actual investor money had been managed. Model portfolio performance for the Dynamic Conservative Model is shown net of the model advisory fee of 0.15% charged by Astoria Portfolio Advisors and does not include trading costs. Effective October 2019, trading commissions were waived at several of the large custodial platforms. The model delivery performance results are net of Astoria Portfolio Advisors' fee and does not include any additional advisory fees charged by advisors employing Astoria's models.

The annualized net performance for Dynamic Conservative Model Composite and benchmark for the period February 1, 2019, to September 29, 2023, is 3.00% and 0.74%, respectively. The composite performance is shown net of the model advisory fee of 0.15% charged by Astoria Portfolio Advisors and includes trading costs when they were in effect. The composite performance results are net of Astoria Portfolio Advisors' fee and does not include any additional advisory fees charged by advisors employing Astoria's models.

Any additional fees charged by an advisor will reduce an investor's return. Performance results shown include the reinvestment of dividends and interest on cash balances where applicable. The data used to calculate the model performance was obtained from sources deemed reliable and then organized and presented by Astoria Portfolio Advisors. The performance calculations have not been audited by any third party. Actual performance of client portfolios may differ materially due to the timing related to additional client deposits or withdrawals and the actual deployment and investment of a client portfolio, the reinvestment of dividends, the length of time various positions is held, the client's objectives and restrictions, and fees and expenses incurred by any specific individual portfolio.
